E. B. ROBERTS TOOK OPEN-AIR TREATMENT FOR CONSUMPTION.

For a Time He Seemed to Be Improving, but Died Suddenly Yesterday Afternoon.

HE WAS A BRIGHT BUSINESS MAN, WITH FINE PROSPECTS.

Rev. Frederick Iske Passes Away at His Home in the City-Other Deaths Recorded.

Errett B. Roberts, aged twenty-two, a young man whose prospects could not have been brighter, died yesterday afternoon at the home of his father, the Rev. J. H. Roberts, 5624 University avenue, Irvington. Consumption was the cause of his untimely death. On the first of last May he was taken ill, and for the last four weeks had been taking the "open air" treatment in a tent on his father's lawn.

His condition had improved steadily under this treatment, and it was thought that he could be removed to Colorado in a snort time. Last Monday, however, he took a sudden turn for the worse, and from that time grew gradually weaker until the end

The young man was born in Dublin, Ind., Eleven years ago his family remarked ability for one so young. He learned the lumber business with B. F. Swain, of the firm of D'Heur & Swain, of Seymour, Ind. About two years ago he. assisted Mr. Swain in organizing the Walnut Lumber Company of this city, which he managed in a most satisfactory manner. He was married last February to Miss

De Lynn Pottemger, of this city, and she, with his father, two brothers, Dr. Alonzo Roberts and William A. Roberts, and two sisters, Mrs. E. E. Stroup, of Shelbyville, and Mrs. C. R. Loop, living in Indianapolis,

Dr. Roberts, in speaking of his brother's sad death, said that notwithstanding the treatment had not been successful in his rother's case, he was still a firm believer in the open-air method of treating tuberculosis. He said his brother had his first semorrhage about the 1st of May. It was a slight one, and no fatal results were feared. As soon as the weather became settled a wall tent was erected in the side yard and continuously for the last four weeks his brother lived entirely in the "He seemed to improve under the treatment," said he, "and we thought it was only a question of a few days until we could remove him to the West, probably Colorado. The first of the week, however, we noted a change for the worse."

The funeral will take place from the home of his father to-morrow morning at

Mr. Morgan is president of the Dayton Traction Company and has been associated with Mr. Weadock for several years in the building of the interurban system connecting a number of Ohio cities and forming a network about Dayton. They believe a line from Indianapolis to Toledo would be a paying proposition, and have made estimates on the cost of construction, which they laid before the meeting yesterday. The line they contemplate would parallel the Wabash for some little distance, con necting Toledo, Defiance, Napoleon and Van Wert, O., and coming as far as Dehas been considered, although it was suggested that the line be built through Hartford City, Alexandria and Noblesville. This territory is already occupied by the Union Traction Company, but the promoters of the new line say they would be glad to make arrangements with this company to use its tracks and in return give the Union Traction Company connection with Toledo. The total length of the line is figured at 250 miles, and the promoters say it can be constructed for \$25,000 per mile.

To Whom It May Concern: At the invitation of The "FORCE" Food Company, of Buffalo, I have visited their Mills and made a careful examination of the materials from which "FORCE" is prepared, and the processes which convert it into its finished condition.

I found that "FORCE" consists exclusively of what my previous analysis indicated, viz.: Whole Wheat and Barley, with a flavoring of Table Salt, flaked, cooked and sterilized by 300 degrees of heat.

A feature of the manufacture which impressed me considerably was the fact that the process is entirely mechanical, the food being prepared, cooked and boxed by machinery, without ever coming in contact with the hands or clothing of the mill operatives. I was also gratified to note that an experienced. Chemist daily supervised the entire output, and that each day's manufacture was also tested by an expert

The "Force" Food Company, Buffalo, N. Y.:
GENTLEMEN—In view of the rumors regarding the alleged adulteration of "FORCE," it has been a satisfaction to me to visit your Mills, investigate, and analyze your product.

You are free to publish this statement made over

my signature, that I found "FORCE" to be absolutely pure, consisting solely of Whole Wheat and Barley, flavored with table Salt, and free from any njurious substance whatever.

I examined, in detail, the various steps in the mannfacture of your product, such as the steam cooking, the flaking and the roasting, as well as the packing, and find all to be remarkably clean and of absolute healthfulness. The final roasting is done at a temperature above 300° F., which, with the steam cooking, completely sterilizes the product, and the entire process, from the first step to the final sealing of the package, is a mechanical one, the product at no time coming in contact with the hands or clothing of the persons handling the machines or packages.

Very respectfully, HERBERT M. HILL, Chemist to the City of Buffalo.
